

RTK Color Bar Label Guide

Chlorpyrifos

HEALTH

FLAMMABILITY

INSTABILITY

With DuraLabel printers your label will be smudge-proof & abrasion-resistant.

Right-to-Know labels* (RTK) are used to provide information about workplace chemicals and hazards. There are two types of RTK labels: NFPA Diamond labels, which provide information for emergency responders; and RTK Color Bar Labels, which provide information about hazards which everyone in the workplace can read and understand in non-emergency situations.

The bold colors used on the RTK Color Bar Label help to enhance visibility from a distance. RTK labels come in a variety of sizes on premium vinyl and are chemical and uv-resistant.

The diagram below describes the **RTK Color Bar Label** and how it is used with our DuraSuite™ Labeling Software.**

Chemical Name

The RTK database contains over 1700 chemicals.

Health

How hazardous is the material to personal health?

Flammability

How flammable is the hazardous material?

Instability

How stable is the hazardous material?

Rate the Level of Danger

Rate each safety category on a scale from 0-4, 0 representing minimal or no danger and 4 being the most severe.

Safety category ratings are fully editable. Save modified or new RTK label templates for future use.

Signal Word

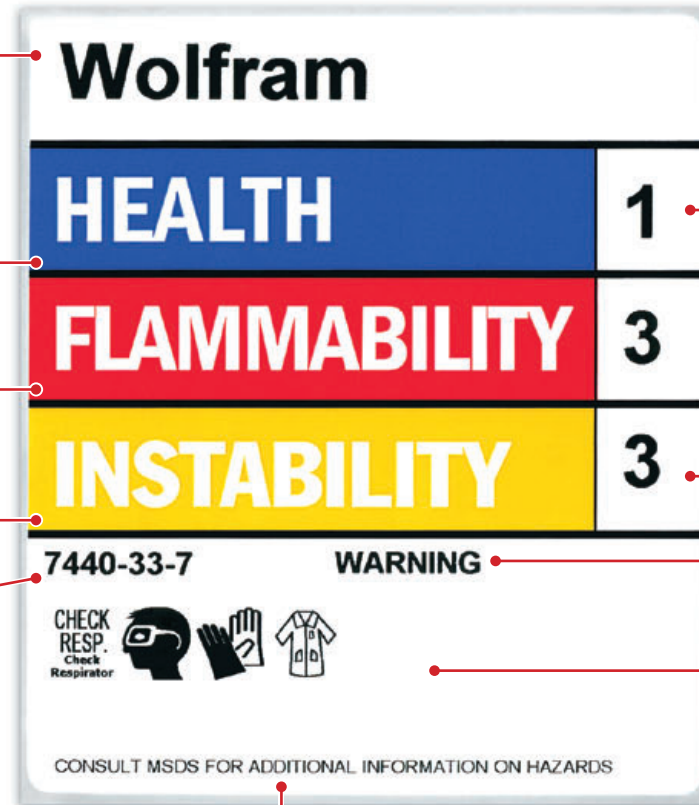

Choose from danger, warning or caution.

Required PPE or Hazards

List PPE using symbols, as in the label to the left. Or, identify both health and organ hazards - see example above right.

Over 1300 symbols to choose from!

CAS Number

Each chemical is assigned a CAS number, a unique numeric identifier.

Database may be searched by chemical name or CAS number.

Reminder

Material Safety Data Sheets (MSDSs) should be available at all times.

Additional OSHA 1910.1200 requirements for employers:

- Developing/implementing a comprehensive hazard communication program
- Providing labeling and MSDSs for all hazardous chemicals
- Explaining hazard communication program to workers
- Explaining use of labeling system to workers
- Explaining use and how to obtain MSDSs to workers

DuraSuite labeling software included!

Just look for the icon for more information.

*RTK labels are required as a part of the OSHA Hazard Communication 1910.1200 standard. DuraLabel RTK Color Bar Labels are OSHA compliant.

**DuraSuite Labeling Software is included with the purchase of a DuraLabel printer. See reverse side for more details.

This guide is for general information purposes only. It is not a substitute for review of applicable standards. Consult MSDS for further instruction.
